

```
#include <WiFi.h>
```

```
void setup() {  
  Serial.begin(115200);  
  delay(1000);
```

```
  WiFi.mode(WIFI_STA);    // initialize Wi-Fi  
  in station mode
```

```
  WiFi.disconnect();    // just to be sure it  
  doesn't connect anywhere
```

```
  delay(100);            // short delay to let Wi-  
  Fi init
```

```
  Serial.print("ESP32 MAC Address: ");  
  Serial.println(WiFi.macAddress());  
}
```

```
void loop() {  
}
```
